

OMOSUYI OLAWOLE

Full-Stack Web Developer

+234 905 567 5574 oomoladev@gmail.com oomoladev-portfolio-dev.vercel.app Lagos, Nigeria

SUMMARY

Full-Stack Developer focused on building production-ready web applications with end-to-end ownership across frontend, backend, and database systems. Experienced in delivering real-world platforms with authentication, payments, and real-time features, emphasizing scalability, performance, and clean user experience.

EXPERIENCE

Full-Stack Developer

Combat Tix

01/2025 - 02/2026 London, United Kingdom (Remote)

- Delivered full-stack features for a combat sports ticketing platform from inception to production releases as part of a small engineering team, contributing across multiple repositories with ownership of key product areas.
- Architected a GraphQL API using a service-layer pattern, implementing Stripe payments (Checkout, Connect), idempotent webhook processing, reservation handling, KYC onboarding, Algolia indexing, and automated ticket PDF generation with Puppeteer.
- Built core product workflows including event creation and management, Algolia-powered search, Stripe checkout with seat reservation flow, and KYC onboarding UI using Stripe Elements.
- Implemented real-time features using Socket.IO for notifications and live dashboard updates across authenticated test users and internal workflows.
- Established CI/CD and testing pipelines using Jest, Playwright, Biome, Husky pre-commit hooks, and GitHub Actions for automated staging and production deployments on Vercel.

Full-Stack Developer

Polis

08/2024 - 01/2025 London, United Kingdom (Remote)

- Delivered a complete booking and payment system, integrating Paystack for secure checkout with date-conflict validation, protected payment links, and real-time booking state handling, paired with a responsive UI featuring conflict error feedback and success animations.
- Built a full save-search feature across backend and frontend, including MongoDB persistence, paginated queries, delete mutations, and a frontend interface with tab filtering, optimistic updates, and state management across navigation.
- Implemented role-based access control end-to-end, enabling automatic role promotion on listing creation and dynamic UI rendering for dashboards, navigation, and management pages based on user roles.
- Developed a shortlet time-limit system across the stack, including Mongoose schema updates, backend resolvers, and frontend calendar-based date blocking with real-time validation feedback.
- Established production-grade testing and analytics using Playwright E2E tests covering core user flows and Google Analytics event tracking for key marketplace interactions.

KEY ACHIEVEMENTS

Built end-to-end payment infrastructure

Architected the Combat Tix payment system, including Stripe PaymentIntent creation, reservation logic with seat and quantity validation, and an idempotent webhook with retry handling, preventing duplicate charges and failed payments ahead of launch.

Delivered Stripe Connect onboarding and payouts system

Implemented Combat Tix's full KYC and Stripe Connect onboarding flow across the API and UI, including connected account creation, document verification, payout configuration, and withdrawals. Validated the workflow across 10+ test accounts prior to launch.

Enabled cross-region platform accessibility using Cloudflare infrastructure

Resolved Polis production domain accessibility issues by implementing Cloudflare-based routing and proxying, improving platform availability in restricted regions.

SKILLS

HTML	CSS	JavaScript	TypeScript
React.js	Next.js	Node.js	Express.js
GraphQL	MongoDB	Jest	Playwright
Vercel	Cloudinary	Resend	Netlify
Backblaze	Git	GitHub	

PROJECTS

Webverse Agency

www.webverseagency.com

Founded a digital agency focused on designing and developing modern, scalable web applications for clients, delivering end-to-end product solutions.

Knowli

https://knowli-two.vercel.app/

Built a full-stack quiz web app that allows users to create and share personalized quizzes for others to test how well they know them, with instant scoring and feedback.

Omo College Assessment platform

https://omocollege.vercel.app/

Built a full-stack academic assessment platform for a school, allowing students to register, authenticate, and access assignments, tests, and computer-based exams.
